**NCSL TASK FORCE ON ENERGY SUPPLY**

HILTON WASHINGTON • WASHINGTON DC • DECEMBER 4-5, 2012

*Draft AGENDA*

The December 2012 meeting of the Task Force on Energy Supply will explore critical energy issues facing states as they work to maintain a reliable electric grid in the face of changing generation resources and emerging technologies. It will also address the challenges of adapting the often antiquated regulatory structure to modern electricity needs and realities.

**Tuesday, December 4**

7:30 p.m. –  
3:00 p.m.

**Tour of the North Anna Nuclear Power Generating Station**

6:00 p.m. –  
9:00 p.m.

**Dinner**

**Wednesday, December 5**

7:30 a.m. –  
8:15 a.m.

**Breakfast**

8:15 a.m. –  
9:30 a.m.

**A New Model for Energy Market Regulation**

The current regulatory regime is ill-equipped to deal with the energy technologies, such as distributed generation, demand management, efficiency and energy storage. New models that help increase reliability allow utilities profit from innovation and energy services, not merely from selling kilowatts, are finding success in some states. Presenters during this session will discuss new regulatory options and how these approaches are working.

9:30 a.m. –  
11:00 a.m.

**Challenges for the Electric Grid: Ensuring Reliability in the New Energy Era**

Coal plant closing, increased reliance on variable energy resources, EPA requirements, increasing natural gas dependence, transmission challenges and new grid technologies all create challenges and uncertainty for the future of the electric grid. What do they mean for reliability, security and stability? This session will discuss these many challenges and how they can be addressed. Topics of discussions will also include the balancing of competing electricity and heating demands for natural gas, backup power challenges and capacity markets.

11:00 a.m.– 11:45 a.m.	<b>State Energy Planning Report and Future Task Force Goals</b> The task force will discuss the legislator's guide to state energy planning as well as future task force goals and work products. Feedback on webinars/publications they'd like to see.
11:45 p.m.	<b>Adjourn For Lunch</b>

### NCSL Energy Supply Task Force Tour of North Anna Nuclear Power Generating Station December 4, 2012

#### Tour Overview

North Anna generates 1,863 megawatts from its two units — enough electricity to power 450,000 homes. Unit 1 began commercial operation in June, 1978 and Unit 2 followed in December 1980.

North Anna is located in Louisa County in central Virginia, northwest of Richmond. The facility was named after the North Anna River, which was dammed to form the 9,600-acre Lake Anna reservoir and the 3,400-acre Waste Heat Treatment Facility, used to provide cooling water for the station.

The Lake Anna reservoir and the Waste Heat Treatment Facility have become a popular outdoor recreational area, whose shoreline is dotted with homes, cabins. There are a number of marinas, campgrounds and a large state park on the Lake Anna reservoir.
